PROFESSIONAL EXPERIENCE

To The New Sep 2022 – present | Noida, India

Software Engineer

- Increased search speed by 40% by developing a real-time data synchronization microservice for **Elasticsearch**, supporting **100K+ queries/day** with multi-keyword search and autocomplete dropdowns.
- Secured 700+ transactions per second by engineering **BoxUpgrade and Recharge microservices** with end-to-end data encryption, ensuring **100% PCI-DSS compliance** and **less then 200ms response times**.
- Reduced CMS page load time by 20% by redesigning pages using **Spring MVC, HTML/CSS, and JavaScript**, enhancing the front-end experience for 500K+ monthly users.
- Reduced database load by 50% and accelerated response times by 35% by integrating **Redis Cache** into the CSL system, streamlining real-time access to over 1M+ records.
- Delivered 100+ scalable **REST APIs with Java and Spring Boot**, maintaining less then 100ms response time under 10K concurrent requests, ensuring high performance at scale.
- Achieved 95% unit test coverage using **JUnit and Mockito**, reducing production bugs by over 80%, and increasing deployment confidence across 3+ critical services.
- Boosted **Elasticsearch** performance by 40% by implementing real-time data synchronization, supporting **multi-keyword search** across 5M+ documents with instant results.
- Protected sensitive data across 2 payment services with advanced encryption algorithms, ensuring zero security breaches and compliance with 100% of financial audit requirements.
- Scaled infrastructure to handle 2x traffic growth by designing **low-latency REST APIs and optimizing microservices** to support 15K+ concurrent users.
- Enabled 24/7 system observability by integrating real-time monitoring with **New Relic and Grafana**, reducing incident resolution time by 60% and increasing system uptime to 99.99%.
- Improved microservice resilience across **50+ production deployments**, reducing failure rates by 70% through code optimization and robust service orchestration.
- Accelerated API response times by 30% and boosted throughput by 2x through performance tuning, directly enhancing end-user experience for 250K+ daily active users.

Simform Solutions Dec 2021 – May 2022 | Ahmedabad, India

Internship Trainee

- Enhanced UI responsiveness by 35% by contributing to the development and maintenance of **React.js web applications**, resulting in a smoother and more intuitive user experience.
- Elevated performance and data consistency by 40% by implementing **Redux** for efficient state management, reducing state-related bugs by 60% across multiple components.

SKILLS

Programming Languages:
Java, JavaScript, HTML/CSS

Frameworks & Libraries
Spring Boot, Spring MVC, React.js, Hibernate, Redux

Databases
MySQL, MongoDB

Search & Caching
Elasticsearch, Redis, Hazelcast

Message Brokers
RabbitMQ, Kafka

Cloud & DevOps
AWS Lambda, S3, Jenkins, Git

Testing & Quality Assurance
JUnit, Mockito, SonarQube, NewRelic

Development Methodologies & Project Management
Agile, Scrum, JIRA

EDUCATION

Oriental Institute of Science & Technology Jul 2018 – Jun 2022 | Bhopal, India

Bachelor of Technology in Computer Science and Engineering

CGPA: 7.12
